

Exercise – 2 Program using Layouts and Listeners

Add the following features for the GUI created in the first exercise

1. Create a button to show the Calender and once the date is selected the calender should collapse and the selected date should set in the textview for DOB
2. Reset Button – should clear all the fields
3. Submit button - should collect the text or values of all the fields and display it in a new activity using Table Layout

Write appropriate event listeners for the Calender and Buttons to achieve this.
